Attachments: removed.txt

Mike,

I just gave you a call but Paula mentioned you were out of the office today. I wanted to let you know that we walked the borrow pit area with Cascade and the sonic rig will not be able perform the borrow pit borings. The area is too steep and uneven to be able to mobilize the rig to the area.

We are currently evaluating other options and we'll let you know what we decide next week. Thank you.

Subject: CFAC SAP Modification #6

Hello Mike,

As discussed, please see the attached modification #6 and associated attachments that summarize the proposed added borings in the borrow pit area. Please let me know if you have any questions.
